

D+ Smart

Part number - 10100-0129A

The ACE Energy D+ Smart module detects whether the engine is running in order to activate equipment that requires this signal.

This ensures that the equipment only operates while the engine is running.

Weight ——— 60 g

Made in France

Specifications

Max. input voltage	20 V
Voltage monitoring	Yes
Max. output current	900 mA
On/off delay	Yes
False-trigger protection	Yes
Start/Stop system	OFF after 30 s stop, ON once restart is confirmed
Operating temperature	-20°C to +65°C
Protection rating	IP20
Warranty	5 years
EMC/ECE-R10	Pending
Protections	Reverse polarity, overload, short circuit

Benefits

- > Simplifies installation
- > No wired connection to the alternator required
- > Compatible with EURO 6 / 6+ vehicles
