

VanBOX SLIM

Reference - 10314-SLIM

The VanBOX-SLIM is an energy box specifically designed to fit under the driver's seat of K0 chassis. It integrates a LiFePO4 battery and three charging modes: DC-DC, AC-DC and solar. It also features 4 independent 12 V outputs protected by automotive blade fuses, a cigarette lighter socket and 2 USB charging ports.

Installation time

Certification

Weight — 14 Kg

Material — PE-HD

Made in France

Battery specifications

Nominal voltage	12.8 V
Nominal capacity	100 Ah / 1280 Wh
Full charge voltage	14.6 V
Max. charge current	50 A
Max. discharge current	100 A
Cycle life	≥ 6,000 cycles at 50% DoD

Certification

R10

Battery pack	E57*10R-060853
DC-DC charger 40 A	E24*10R-064129

CHARGING MODES

DC-DC charger

Input voltage	9 V à 32 V
Charge current	40 A
Automatic D+ detection	Yes

Solar charger

Input voltage	≤ 32 V
Charge current	40 A
Max. PV power	500 W

AC-DC charger

Charge current	20 A
